Insights

Profit rose steadily in first half and will continue in the second half. Despite the global uncertainties that will remain this fuels expansion and M&A.

Strategies

The strategic focus remained unchanged in the first half of 2024 for most Specialty and Diversified Chemical Companies but implementation efforts recovered. Asian companies continue to be interested in European companies driven by the supply chain experiences since 2021

Trends

Unchanged trend to divest cyclical or volatile businesses as well as a strong focus on more narrow parts of the process chain in the mid term.

That leads to transformations of portfolios especially in the area of diversified chemicals.

Key growth areas

New and affordable products with a better carbon footprint or sustainability component that enrich or transform traditional offerings. Highly specialized areas like those with strong application patterns. Demand of many Additives continue to recover or rise above 2022 levels.
